Silver Recovery

Comments

This facility has a permit for collecting rinse water from the chrome plating operation into an underground tank. The original permit (issued in 1977) was for off-site treatment. In the late 1980's they installed a precipitation and evaporation system. The sludge cake is hauled off-site.

This company must submit a new City IW Permit with plans showing the details of the pretreatment and evaporation system. Ed Kruck, Shop Superintendent, will complete the application and submit a copy of the plans by 7/12/96.

NOTE: LACDPW has issued a UST permit for the collection sump.
